DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on February 28, 2007 has been fully considered and entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 1 of claim 19, please delete "A fiber attachment of comprising:" and insert -- An optical fiber attachment comprising: --.

In line 1 of claim 22, please delete "A optical fiber attachment comprising:" and insert -- An optical fiber attachment comprising: --.

Reasons for Allowance

3. Claims 2-15 and 18-27 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest all the limitations recited in claim 10. Specifically, the prior art of record fails to disclose a method for

forming an attachment to an optical fiber comprising the steps of positioning the optical fiber over a hot pad; melting the solder glass preform into molten solder glass; lowering the optical fiber into the molten solder glass and wherein the aligning the optical fiber includes aligning relative to an optoelectronic component in combination with the other limitations of claim 10.

Claims 2-9 and 11-15 depend from claim 10.

The prior art of record also fails to disclose or reasonably suggest all the limitations recited in claim 19. Specifically, the prior art of record fails to disclose an optical fiber attachment, wherein heat is removed from one side of the substrate to concentrate heat to the opposite side of the substrate, the solder glass being positioned on the opposite side in combination with the other limitations of claim 19.

Claims 18, 20 and 21 depend from claim 19.

The prior art of record also fails to disclose or reasonably suggest all the limitations recited in claim 22. Specifically, the prior art of record fails to disclose an optical fiber attachment comprising the hot pad including a resistive element positioned adjacent a surface of the substrate, a center pad positioned on a surface of the resistive element that is opposite of the surface of the resistive element adjacent to the substrate, and the side pads being electrically connected through the resistive element and electrically isolated from the center pad and wherein solder glass is positioned on the
